## **My First Program Using Flowgorithm**

These past few weeks we have to make Flowgorithm activities wherein we need to input our flowcharts activities to Flowgorithm wherein it is difficult for me since it was my first encounter however, the more we have activities the more I got familiarize which is good even though we have plenty of activities. And these week we don't play Kahoot that we usually do which is new since it was the first thing that we do before discussion, we answer exercises which is serve us a reviewer because Midterm is approaching so we don't have time to play Kahoot which is okay since we need to prioritize our written activities for us to have or we don't have a hard time when we answer our midterm exam.
