AC192

My First Flowcharts

Our first activity or the flowchart research help me to have an overview on how to make a flowcharts. Most especially the uses of the flowchart symbols it helps me what to use. However, despite of the research or the overview on flowcharts I'm having a hard time on making one most especially the activity when we need to make a flowchart in "Area of a Circle" I research the formulas for radius and diameter, but I encounter the decision symbol in our Entrepreneurship class so it's not new for me to use that also thanks to help of Google for helping me out and my classmate's work when their work shared to the class I was able to make one. And also the Kahoot, the most awaited game of our section every Tuesday and Friday, and that day we experience the group type which is more exciting and knowing AC192 they are very competitive when it comes to that game so it was fun. I'm looking forward for more Kahoot games and also some flowchart activities.
