

## **FIRST WEEK OF PROGCON**

Our first week of ProgCon is really fun most especially when we are doing our energizer which is the Kahoot. Kahoot is not only the energizer it also our review of our stock knowledge to this subject. And also, we discover another site (Trello) where we can collaborate or can interact with the class other than the Microsoft Teams that we usually used. And I'm looking forward to our further lessons.

My expectation in this class that it will be fun, we can learn something that we can use in the future.
