Introduction to Github

In our first meeting our professor introduce to us the Github at first I don't know what's the purpose of Github and I'm having a hard time since it is my first encounter. We use Github, just like the Trello wherein we can store our activities but Github is more complicated one and you need to put some description per upload that I don't usually do when I upload my activities to Trello. However, I'm excited to explore more in Github and learn more about this site.
